

**NAME**

DPMSDisable - disables DPMS on the specified display

**SYNOPSIS**

```
cc [ flag ... ] file ... -lXext [ library ... ]  
#include <X11/extensions/dpms.h>
```

**Status** DPMSDisable ( Display *\*display* );

**ARGUMENTS**

*display*

Specifies the connection to the X server

**DESCRIPTION**

The *DPMSDisable* function disables Display Power Management Signaling (DPMS) on the specified display. When disabled, DPMS sets the display to DPMSModeOn. If *DPMSDisable* is invoked on a display with DPMS already disabled or on a display which does not support DPMS, no change is made and no error is returned.

**RETURN VALUES**

TRUE           The *DPMSDisable* function always returns TRUE.
