

NAME

FcDirCacheLoadFile - load a cache file

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
FcCache * FcDirCacheLoadFile (const FcChar8 *cache_file, struct stat *file_stat);
```

DESCRIPTION

This function loads a directory cache from *cache_file*. If *file_stat* is non-NULL, it will be filled with the results of `stat(2)` on the cache file.
