NAME

    FcPatternGetWithBinding - Return a value with binding from a pattern

SYNOPSIS

    #include <fontconfig/fontconfig.h>

    FcResult FcPatternGetWithBinding (FcPattern **p**, const char ****object**, int** *id***, FcValue ****v**, FcValueBinding ****b**);**

DESCRIPTION

    Returns in *v* the *id*'th value and *b* binding for that associated with the property *object*. The Value
    returned is not a copy, but rather refers to the data stored within the pattern directly. Applications must
    not free this value.

SINCE

    version 2.12.5
