NAME

SPI_getnspname - return the namespace of the specified relation

SYNOPSIS

char * SPI_getnspname(Relation *rel*)

DESCRIPTION

SPI_getnspname returns a copy of the name of the namespace that the specified Relation belongs to. This is equivalent to the relation's schema. You should **pfree** the return value of this function when you are finished with it.

ARGUMENTS

Relation *rel*

input relation

RETURN VALUE

The name of the specified relation's namespace.
