

NAME

UPower - System-wide Power Management

DESCRIPTION

UPower provides an interface to enumerate power sources on the system and control system-wide power management. Any application can access the *org.freedesktop.UPower* service on the system message bus.

AUTHOR

Written by David Zeuthen <davidz@redhat.com>, Richard Hughes <richard@hughsie.com> and with a lot of help from many others.

BUGS

Please send bug reports to either the distribution or the DeviceKit mailing list, see <http://lists.freedesktop.org/mailman/listinfo/devkit-devel> on how to subscribe.
