

NAME

XGrabServer, XUngrabServer - grab the server

SYNTAX

```
int XGrabServer(Display *display);
```

```
int XUngrabServer(Display *display);
```

ARGUMENTS

display Specifies the connection to the X server.

DESCRIPTION

The **XGrabServer** function disables processing of requests and close downs on all other connections than the one this request arrived on. You should not grab the X server any more than is absolutely necessary.

The **XUngrabServer** function restarts processing of requests and close downs on other connections. You should avoid grabbing the X server as much as possible.
