NAME

    XkbGetXlibControls - Determines the current state of the Library Controls

SYNOPSIS

    unsigned int XkbGetXlibControls (Display *_display_);

ARGUMENTS

    display

        connection to X server

DESCRIPTION

    XkbGetXlibControls returns the current state of the Library Controls as a bit mask that is an inclusive
OR of the control masks from Table 1 for the controls that are enabled. For the optional compose
processing controls, the fact that a control is enabled does not imply that it is actually implemented.

Table 1 Library Control
Masks

Library Control Mask	Value
XkbLC_ForceLatin1Lookup	(1 << 0)
XkbLC_ConsumeLookupMods	(1 << 1)
XkbLC_AlwaysConsumeShiftAndLock	(1 << 2)
XkbLC_IgnoreNewKeyboards	(1 << 3)
XkbLC_ConsumeKeysOnComposeFail	(1 << 29)
XkbLC_ComposeLED	(1 << 30)
XkbLC_BeepOnComposeFail	(1 << 31)
XkbLC_AllControls	(0xc0000007)
