NAME

ams - ADB Mouse Driver

SYNOPSIS

To compile this driver into the kernel, place the following lines in your kernel configuration file:

device adb

DESCRIPTION

The **ams** driver provides support for mice and trackpads attached to the Apple Desktop Bus (ADB) implementing both the base and extended ADB mouse protocols.

HARDWARE

Devices supported by the **ams** driver include:

- Apple Mouse
- ADB Extended Mouse
- MacAlly 2-Button Mouse
- Apple iBook Trackpad
- Apple PowerBook Trackpad

SYSCTL VARIABLES

dev.ams.%d.tapping

On ADB trackpads, setting this sysctl to 1 causes taps on the trackpad to be interpreted as button clicks.
