

NAME

caja-sendto - convenience application to send a file via email or instant messenger

SYNOPSIS

caja-sendto [*OPTIONS* / *FILES...*]

DESCRIPTION

Send FILE(s) via email or instant messenger.

A dialog window presents a choice of carrier application and recipient of the file(s). Recipient names can be selected from a list or autocompleted. The selected application is then opened with the file(s) and recipient ready for transfer.

The application is intended to integrate with caja and is written for the MATE graphical desktop.

OPTIONS

-, --help

Show a help message listing all the options and their meanings.
