

NAME

cos, cosf, cosl - cosine functions

LIBRARY

Math Library (libm, -lm)

SYNOPSIS

```
#include <math.h>
```

double

```
cos(double x);
```

float

```
cosf(float x);
```

long double

```
cosl(long double x);
```

DESCRIPTION

The **cos()**, **cosf()**, and **cosl()** functions compute the cosine of *x* (measured in radians). A large magnitude argument may yield a result with little or no significance. For a discussion of error due to roundoff, see *math(3)*.

RETURN VALUES

The **cos()**, **cosf()**, and **cosl()** functions return the cosine value.

SEE ALSO

acos(3), *asin(3)*, *atan(3)*, *atan2(3)*, *ccos(3)*, *cosh(3)*, *math(3)*, *sin(3)*, *sinh(3)*, *tan(3)*, *tanh(3)*

STANDARDS

These functions conform to ISO/IEC 9899:1999 ("ISO C99").

HISTORY

The **cos()** function first appeared in Version 1 AT&T UNIX.
