NAME

dcons_crom - Configuration ROM stub for dcons(4)

SYNOPSIS

device dcons_crom
device dcons
device firewire

DESCRIPTION

The **dcons_crom** exposes the buffer address of dcons(4) through the Configuration ROM of firewire(4). This address is supposed to be used by dconschat(8).

SEE ALSO

dcons(4), firewire(4), fwohci(4), dconschat(8), fwcontrol(8)

AUTHORS

Hidetoshi Shimokawa *<simokawa@FreeBSD.org>*

BUGS

If you load *dcons_crom.ko* manually after the system is booted, you may have to initiate a bus reset using "**fwcontrol -r**" to update the Configuration ROM.
