NAME

device_get_children - get a list of devices connected to a device

SYNOPSIS

#include <sys/param.h>
#include <sys/bus.h>

int
device_get_children(*device_t dev*, *device_t **devlistp*, *int *devcountp*);

DESCRIPTION

Retrieve a list of all device instances currently connected to *dev* and return the list in **devlistp* and the count in **devcountp*. The memory allocated for the list should be freed using **free**(**devlistp*, *M_TEMP*). *devlistp* and *devcountp* are not changed when an error is returned.

RETURN VALUES

Zero is returned on success, otherwise an appropriate error is returned.

SEE ALSO

devclass(9), device(9)
