

NAME

gencnval - compile the converters aliases file

SYNOPSIS

gencnval [**-h, -?, --help**] [**-v, --verbose**] [**-c, --copyright**] [**-s, --sourcedir** *source*] [**-d, --destdir** *destination*] [*converterfile*]

DESCRIPTION

gencnval converts the ICU aliases file *converterfile* into the binary file **cnvalias.icu**. This binary file can then be read directly by ICU, or used by **pkgdata(1)** for incorporation into a larger archive or library.

If *converterfile* is not provided, the default ICU **convrtrs.txt** file is used.

OPTIONS

-h, -?, --help

Print help about usage and exit.

-v, --verbose

Display verbose output. This information can include information about conflicting aliases and the converters the aliases resolve to.

-c, --copyright

Include a copyright notice in the binary data.

-s, --sourcedir *source*

Set the source directory to *source*. The default source directory is specified by the environment variable **ICU_DATA**.

-d, --destdir *destination*

Set the destination directory to *destination*. The default destination directory is specified by the environment variable **ICU_DATA**.

ENVIRONMENT**ICU_DATA**

Specifies the directory containing ICU data. Defaults to **\${prefix}/share/icu/73.2/**. Some tools in ICU depend on the presence of the trailing slash. It is thus important to make sure that it is present if **ICU_DATA** is set.

FILES

icu/source/data/mappings/convrtrs.txt

Description of ICU's converters and their aliases. This data file is not normally installed, and it is available as a part of ICU source code.

VERSION

73.2
