NAME

gnutls_ocsp_resp_get_certs - API function

SYNOPSIS

#include <gnutls/ocsp.h>

int gnutls_ocsp_resp_get_certs(gnutls_ocsp_resp_const_t *resp***, gnutls_x509_crt_t **** *certs***, size_t ***
*ncerts***);**

ARGUMENTS

gnutls_ocsp_resp_const_t resp

should contain a **gnutls_ocsp_resp_t** type

gnutls_x509_crt_t ** certs

newly allocated array with **gnutls_x509_crt_t** certificates

size_t * ncerts output variable with number of allocated certs.

DESCRIPTION

This function will extract the X.509 certificates found in the Basic OCSP Response. The *certs* output
variable will hold a newly allocated zero-terminated array with X.509 certificates.

Every certificate in the array needs to be de-allocated with **gnutls_x509_crt_deinit**() and the array itself
must be freed using **gnutls_free**().

Both the *certs* and *ncerts* variables may be NULL. Then the function will work as normal but will not
return the NULL:d information. This can be used to get the number of certificates only, or to just get
the certificate array without its size.

RETURNS

On success, **GNUTLS_E_SUCCESS** (0) is returned, otherwise a negative error value.

REPORTING BUGS

Report bugs to <bugs@gnutls.org>.
