

NAME

gvmcapture - VNC screenshot capture

SYNOPSIS

gvmcapture [OPTION]... [HOST][:DISPLAY] FILENAME

DESCRIPTION

Capture a screenshot of the VNC desktop at HOST:DISPLAY saving to the image file FILENAME. If HOST is omitted it defaults to "localhost", if :DISPLAY is omitted, it defaults to ":1". FILENAME must end in a known image format extension (eg ".png", ".jpeg"). Supported options are

--help, -?

Display command line help information

--quiet, -q

Do not display information on the console when capturing the screenshot, with the exception of any password prompt.

--debug, -d

Display verbose debugging information on the console

EXIT STATUS

The exit status is 0 upon successful screen capture, otherwise it is a non-zero integer

EXAMPLES

```
# gvmcapture localhost:1 desktop.png
Password:
Connected to localhost:1
Saved display to desktop.png
```
