

NAME

kdestroy - remove one credential or destroy the current ticket file

SYNOPSIS

kdestroy [-c *cachefile*] [--credential=*principal*] [--cache=*cachefile*] [-A | --all] [--no-unlog] [--no-delete-v4] [--version] [--help]

DESCRIPTION

kdestroy removes one credential or the current set of tickets.

Supported options:

-credential=*principal*

remove *principal* from the credential cache if it exists.

-c *cachefile*

-cache=*cachefile*

The cache file to remove.

-A

--all remove all credential caches.

--no-unlog

Do not remove AFS tokens.

--no-delete-v4

Do not remove v4 tickets.
