NAME

libssh2_knownhost_init - init a collection of known hosts

SYNOPSIS

#include <libssh2.h>

LIBSSH2_KNOWNHOSTS *
libssh2_knownhost_init(LIBSSH2_SESSION *session);

DESCRIPTION

Init a collection of known hosts for this session. Returns the handle to an internal representation of a known host collection.

Call **libssh2_knownhost_free(3)** to free the collection again after you are doing using it.

RETURN VALUE

Returns a handle pointer or NULL if something went wrong. The returned handle is used as input to all other known host related functions libssh2 provides.

AVAILABILITY

Added in libssh2 1.2
