

NAME

libssh2_poll_channel_read - check if data is available

SYNOPSIS

```
#include <libssh2.h>
```

```
int
```

```
libssh2_poll_channel_read(LIBSSH2_CHANNEL *channel, int extended);
```

DESCRIPTION

This function is deprecated. Do not use.

libssh2_poll_channel_read(3) checks to see if data is available in the *channel*'s read buffer. No attempt is made with this method to see if packets are available to be processed. For full polling support, use *libssh2_poll(3)*.

RETURN VALUE

Returns 1 when data is available and 0 otherwise.
