

**NAME**

libssh2\_publickey\_remove - convenience macro for *libssh2\_publickey\_remove\_ex(3)* calls

**SYNOPSIS**

```
#include <libssh2.h>
```

```
int
```

```
libssh2_publickey_remove(LIBSSH2_PUBLICKEY *pkey,  
                        const unsigned char *name, unsigned long name_len,  
                        const unsigned char *blob, unsigned long blob_len);
```

**DESCRIPTION**

This is a macro defined in a public libssh2 header file that is using the underlying function *libssh2\_publickey\_remove\_ex(3)*.

**RETURN VALUE**

See *libssh2\_publickey\_remove\_ex(3)*

**ERRORS**

See *libssh2\_publickey\_remove\_ex(3)*
