

NAME

libssh2_session_hostkey - get the remote key

SYNOPSIS

```
#include <libssh2.h>
```

```
const char *
```

```
libssh2_session_hostkey(LIBSSH2_SESSION *session,  
                        size_t *len, int *type);
```

DESCRIPTION

Returns a pointer to the current host key, the value *len* points to will get the length of the key.

The value *type* points to the type of hostkey which is one of: LIBSSH2_HOSTKEY_TYPE_RSA, LIBSSH2_HOSTKEY_TYPE_DSS, or LIBSSH2_HOSTKEY_TYPE_UNKNOWN.

RETURN VALUE

A pointer, or NULL if something went wrong.
