NAME

libssh2_sftp_tell - get the current read/write position indicator for a file

SYNOPSIS

#include <libssh2.h>
#include <libssh2_sftp.h>

size_t
libssh2_sftp_tell(LIBSSH2_SFTP_HANDLE *handle);

DESCRIPTION

handle - SFTP File Handle as returned by **libssh2_sftp_open_ex(3)**.

Returns the current offset of the file handle's internal pointer. Note that this is now deprecated. Use the newer **libssh2_sftp_tell64(3)** instead!

RETURN VALUE

Current offset from beginning of file in bytes.

SEE ALSO

libssh2_sftp_open_ex(3), libssh2_sftp_tell64(3)
