**NAME**

    LightsOff - Turn off all the lights

**SYNOPSIS**

    **lightsoff** [*OPTION...*]

**DESCRIPTION**

    Lights Off is a collection of light switch puzzles. Clicking on a light toggles it either on or off, but also toggles all the surrounding lights, too. Your objective is simple: turn off all the lights!

    Players who delight in turning off lights will enjoy the huge number of levels.

**OPTIONS**

    **-v, --version**

        Prints the program version and exits.

    This program also accepts the standard GTK+ options.

**AUTHORS**

    **lightsoff** was written by Tim Horton and various other people.

    This manual page was written by Arnaud Bonatti for the GNOME project.
