

Name

mysql_get_character_set_info - returns character set information

Synopsis

```
#include <mysql.h>
```

```
void mysql_get_character_set_info(MYSQL * mysql,  
                                MY_CHARSET_INFO * charset);
```

Description

Returns information about the current default character set for the specified connection.

Parameters

- ⊕ `mysql` - a connection identifier, which was previously allocated by **mysql_init(3)** and connected by **mysql_real_connect(3)**.
- ⊕ `charset` - a pointer to a MY_CHARSET_INFO structure, in which the information will be copied.

Notes

- ⊕ A complete list of supported character sets in the client library is listed in the function description for **mysql_set_character_set(3)**.
