NAME

PCRE2 - Perl-compatible regular expressions (revised API)

SYNOPSIS

#include <pcre2.h>

void pcre2_substring_list_free(PCRE2_SPTR *list**);**

DESCRIPTION

This is a convenience function for freeing the store obtained by a previous call to
pcre2substring_list_get(). Its only argument is a pointer to the list of string pointers. If the argument is
NULL, the function returns immediately, without doing anything.

There is a complete description of the PCRE2 native API in the **pcre2api** page and a description of the
POSIX API in the **pcre2posix** page.
