

NAME

pf2afm - Make an AFM file from Postscript (PFB/PFA/PFM) font files using ghostscript

SYNOPSIS

pf2afm *fontfilename*

DESCRIPTION

This script invokes **gs(1)** to make an AFM file from PFB / PFA and (optionally) PFM files. Output goes to *fontfilename.afm*, which must not already exist.

SEE ALSO

gs(1)
pf2afm.ps in the Ghostscript lib directory.

VERSION

This document was last revised for Ghostscript version 9.56.1.
