

NAME

pgfind - locate a process group by number

SYNOPSIS

```
#include <sys/param.h>
```

```
#include <sys/proc.h>
```

```
struct pgrp *
```

```
pgfind(pid_t pgid);
```

DESCRIPTION

The **pgfind()** function takes a *pgid* as its argument and returns a pointer to the *pgrp* structure whose *pg_id* is specified in the argument.

pgfind() locks the *pgrp* structure that is returned.

RETURN VALUES

The **pgfind()** function returns NULL on failure or a pointer to a *pgrp* structure on successful completion.

SEE ALSO
