

**NAME**

**pgfind** - locate a process group by number

**SYNOPSIS**

```
#include <sys/param.h>
```

```
#include <sys/proc.h>
```

```
struct pgrp *
```

```
pgfind(pid_t pgid);
```

**DESCRIPTION**

The **pgfind()** function takes a *pgid* as its argument and returns a pointer to the *pgrp* structure whose *pg\_id* is specified in the argument.

**pgfind()** locks the *pgrp* structure that is returned.

**RETURN VALUES**

The **pgfind()** function returns NULL on failure or a pointer to a *pgrp* structure on successful completion.

**SEE ALSO**

pfind(9)
