

**NAME**

**pthread\_resume\_all\_np** - resume all suspended threads

**LIBRARY**

POSIX Threads Library (libpthread, -lpthread)

**SYNOPSIS**

```
#include <pthread_np.h>
```

*void*

```
pthread_resume_all_np(void);
```

**DESCRIPTION**

The **pthread\_resume\_all\_np()** function causes all active threads to be scanned and resumes those which were previously suspended.

**SEE ALSO**

pthread\_attr\_setcreatesuspend\_np(3), pthread\_np(3), pthread\_resume\_np(3),  
pthread\_suspend\_all\_np(3), pthread\_suspend\_np(3)
