

NAME

pw-mididump - The PipeWire MIDI dump

SYNOPSIS

pw-mididump [*options*] [*FILE*]

DESCRIPTION

Dump MIDI messages to stdout.

When a MIDI file is given, the events inside the file are printed.

When no file is given, **pw-mididump** creates a PipeWire MIDI input stream and will print all MIDI events received on the port to stdout.

OPTIONS

-r | **--remote=NAME**

The name the remote instance to monitor. If left unspecified, a connection is made to the default PipeWire instance.

-h | **--help**

Show help.

--version

Show version information.
