NAME

uptime - show how long system has been running

SYNOPSIS

uptime

DESCRIPTION

The **uptime** utility displays the current time, the length of time the system has been up, the number of users, and the load average of the system over the last 1, 5, and 15 minutes.

FILES

/boot/kernel/kernel system name list

EXAMPLES

```
$ uptime
11:23AM  up  3:01, 8 users, load averages: 21.09, 15.43, 12.79
```

SEE ALSO
