

**NAME**

`xcb_free_gc` - Destroys a graphics context

**SYNOPSIS**

```
#include <xcb/xproto.h>
```

**Request function**

```
xcb_void_cookie_t xcb_free_gc(xcb_connection_t *conn, xcb_gcontext_t gc);
```

**REQUEST ARGUMENTS**

*conn*           The XCB connection to X11.

*gc*             The graphics context to destroy.

**DESCRIPTION**

Destroys the specified *gc* and all associated storage.

**RETURN VALUE**

Returns an *xcb\_void\_cookie\_t*. Errors (if any) have to be handled in the event loop.

If you want to handle errors directly with *xcb\_request\_check* instead, use *xcb\_free\_gc\_checked*. See **xcb-requests(3)** for details.

**ERRORS**

*xcb\_g\_context\_error\_t*  
The specified graphics context does not exist.
