

**NAME**

**xo\_set\_version**, **xo\_set\_version\_h** - record content-version information in encoded output

**LIBRARY**

Text, XML, JSON, and HTML Output Emission Library (libxo, -lxo)

**SYNOPSIS**

```
#include <libxo/xo.h>
```

*void*

```
xo_set_version(const char *version);
```

*void*

```
xo_set_version_h(xo_handle_t *xop, const char *version);
```

**DESCRIPTION**

The **xo\_set\_version** function records a version number to be emitted as part of the data for encoding styles (XML and JSON). This version number is suitable for tracking changes in the content, allowing a user of the data to discern which version of the data model is in use.

**SEE ALSO**

xo\_emit(3), libxo(3)

**HISTORY**

The **libxo** library first appeared in FreeBSD 11.0.

**AUTHORS**

**libxo** was written by Phil Shafer <phil@freebsd.org>.
